For Your Toughest
Applications**

Reiloy barrel blanks
are now in stock at
Westland Corporation

Call **800-247-1144**
to learn more about
increasing wear resistance
and efficiencies using this
premier bimetallitic barrel.

Westland Corporation manufactures bimetallitic barrels from Reiloy centrifugally cast barrel blanks. Reiloy, a division of Reifenhauser Group, has long been an acknowledged leader in the bimetallitic barrel industry.

Due to their proven production process, Reiloy barrel blanks are absolutely free from distortion, eliminating the need for time-consuming, labor intensive straightening operations and stress-relief annealing.

All the armouring alloys used in these barrel blanks are developed in Reiloy's own material laboratory and are continually tested under tough operating conditions.

The barrel blanks produced from these outstanding alloys are highly wear resistant and can be used in your toughest applications.
