

Barrel & Screw Stocking Program

Reiloy USA offers the Barrel & Screw Stocking Program to facilitate the timely availability of new and reconditioned barrels, screws, valves and end caps for customers who anticipate or plan for future requirements. The terms of this agreement are outlined below:

New Barrels & Screws

1. A hard copy purchase order is required prior to entering an order into Reiloy USA's system. Purchase Order must clearly state components ordered are to be put into the Barrel & Screw Stocking Program.
2. If print approval is required, Reiloy USA will forward prints of the components to the customer for verification.
3. Reiloy USA will manufacture the components to approved print specifications, ready for identification and placement in customer's stocking inventory.

Reconditioned Screws & Barrels

1. Reiloy USA will receive the barrel or screw in need of repair; clean and inspect the components, preparing them for rebuild.
2. Reiloy USA will notify the customer of the recommended repair requirements, type of materials to be used and repair cost, prior to the commencement of work.
3. After receiving customer hard copy purchase order, Reiloy USA will complete the agreed upon repairs ready for identification and place them in customer's stocking inventory.

All Components

1. Reiloy USA will mark each barrel, screw, valve and end cap with appropriate identifying numbers (Reiloy USA's work order number and any requested customer ID), package the component for shipment and place in customer's stocking inventory ready for immediate shipment.
2. Reiloy USA will provide the customer with a monthly report of all components in process and those in the customer's stocking inventory, ready for shipment.
3. Reiloy USA will ship components to the customer, as requested, within 24 hour of notification to ship. Labels and shipping papers will contain the identifying numbers for the components shipped.
4. The customer will be invoiced for the cost of the components at original purchase order prices. There is no stocking fee or carrying charge for this service. Reiloy USA invoices are due Net 30 days. Shipments are made freight collect.
5. Any unshipped components will be held by Reiloy USA in the customer's stocking inventory for one year from date of completion. When one year has elapsed, the customer will be invoiced for the cost of such components, as described above, and components will be shipped to the customer.
6. A \$150 restocking fee applies on orders returned to utilize Reiloy USA's Barrel & Screw Stocking Program when customer's original hard copy purchase order does not clearly state the order is for the Barrel & Screw Stocking Program.

Please contact Reiloy USA's sales department at 800-247-1144 if you have any questions regarding this program or other services.
